Printing Notes: Print double sided, flipped along long edge.

How has AI affected the amount and way you communicate with other people?

What do we gain if we turn to AI for conversation, advice, emotional support, or friendship? What do we lose?

How are your friends, classmates, coworkers, or family using AI? Do different people use it differently?

Have you ever seen an image or video that you thought was real but found out later that it was AI-generated, or still aren't sure?

Is there anything you used to do that you now have AI do for you?

Does using AI make you feel more or less independent?

In your school, what is the policy around AI in school/work? What do you think is good and bad about the policy?

Is there anything related to AI that you're interested in understanding better or learning more about?

Think About: Availability · Privacy · Judgment · Empathy · Human connection · Trust

Go Deeper: Are some things you'd rather talk about with AI? What would you rather talk about with another person? Why?

Think About: Texting · Writing help · Tone · Face-to-face conversations · Convenience · Connection

Go Deeper: Do you ever have AI write or rewrite messages for you? Does the message still feel like it came from you?

Think About: Deepfakes · Editing · Social media · Source · Context · Verification

Go Deeper: What made you believe it was real or question it? What could you do when you're unsure whether something is AI-generated?

Think About: School · Work · Advice · Entertainment · Age

Go Deeper: Why do you think some people use AI more than others? Are there ways people around you use AI that you would, or wouldn't, use yourself?

Think About: Learning · Problem-solving · Decisions · Convenience · Skills · Reliance

Go Deeper: How might relying on AI for answers, decisions, or everyday tasks change what we learn to do for ourselves? When does assistance become reliance?

Think About: Writing · Searching · Brainstorming · Planning · Creating · Everyday tasks

Go Deeper: Is there anything you'd never want AI to do for you—even if it could do it better? Where would you draw the line, and why?

Think About: How it works · Data · Privacy · Bias · Jobs · Creativity · Future of AI

Go Deeper: What about AI worries, confuses, or makes you curious? If you could ask an AI expert one question, what would you ask?

Think About: Allowed uses · Prohibited uses · Fairness · Transparency · Enforcement · Learning

Go Deeper: Do people actually follow the rules? If you could change one thing about your school or workplace's approach to AI, what would it be?

Do you say please and thank you to an AI? Why or why not?

Can AI make mistakes? Have you ever seen AI make a mistake?

How does YouTube know which videos you might want to watch? What about Spotify or other apps?

What skills do you think are important to know how to do by yourself? Would that change if AI could do them? Why?

When do you or your friends use AI in your daily life?

What does “artificial intelligence” or AI mean to you?

Have any of your teachers talked to you about AI in class? What did they say?

Have you ever seen an image or video that you thought was real but found out was AI-generated?

Think About: Wrong answers · Made-up information · Misunderstandings · Confidence · Checking sources

Go Deeper: How did you know the AI was wrong? What could you do if you aren't sure whether an AI-generated answer is correct?

Think About: Manners · Habits · Feelings · People vs. Machines · Respect

Go Deeper: Does it matter how we talk to something that doesn't have feelings? Could the way we talk to AI affect how we talk to people?

Think About: Writing · Math · Research · Creativity · Problem-solving · Communication · Decision-making

Go Deeper: If AI could do something better or faster than you, would it still be worth learning how to do it yourself? Why or why not?

Think About: What you watch · Likes · Searches · Recommendations · Your data · Algorithms

Go Deeper: Why do apps want to get better at predicting what you like? Who benefits when they make a good recommendation?

Think About: Computers · Learning · Patterns · Predictions · Chatbots · Robots · Human intelligence

Go Deeper: What makes something "AI" instead of just a computer program? What is one example you think is definitely AI—and one you're not sure about?

Think About: AI in your daily life? School · Games · Search · Social media · Chatbots · Recommendations

Go Deeper: Which AI tools do you choose to use? Are there times when AI might be working behind the scenes without you realizing it?

Think About: Social media · AI images · Deepfakes · Editing · Sources · Clues · Verification

Go Deeper: What made it look real—or made you suspicious? What could you do before believing or sharing an image or video you're unsure about?

Think About: School rules · Learning · Assignments · Allowed vs. not allowed · Different teachers

Go Deeper: Do all of your teachers have the same expectations about AI? What do you think students should learn about AI at school?
